35 YEARS OF EXCELLENCE

Dr. D. Dikshit
M.B.B.S., D.C.P.
FICA (USA) Path & Bact.

Dr. Rohan Dikshit
M.B.B.S., D.M.R.D. (Radiologist)
Ex SR, HIMS Dehradun and
KGMU Lucknow
Fetal Medicine Foundation UK Certified

Dr. Kirti D Dikshit
M.B.B.S., M.D. (Pathology)
Ex SR : Dr. RMLIMS Lucknow
Fellow Tata Memorial Hospital
Mumbai

Patient Name	: **Mr. AKSHAT KUMAR**				
UID	: **022501010003**	**Sample No :**	**10353339**	Registered	: **01/01/2025 11:25AM**
Ref. By	: **Dr. U.BANSAL MBBS**			Sample Collection	: **01/01/2025 11:47AM**
Age/Sex	: **19 YEARS/MALE**			Reported	: **01/01/2025 01:06PM**

TEST NAME		RESULTS	UNITS	BIO.REF.RANGE
Primary Sample Type: EDTA				
Complete Blood Count(CBC)*				
Haemoglobin (Method: SLS)		14.5	Gm/dL	Adult(Male) 12.5 -18 Child(Male) 10 -14 Infants 14 - 20
Total W.B.C. Count (Method:Flow cytometry by laser)	L	**3.88**	10^3/uL.	5.0 - 10.0
W.B.C. Differential Count				
Polymorphs		62.9	%	40 - 75
Lymphocytes		29.1	%	20 - 45
Eosinophils		2.3	%	1 - 6
Monocytes		5.2	%	2 - 10
Basophils		0.5	%	0 - 1
Platelet Counts				
Platelet Count (Method:Hydrodynamically foccussed electric impedence)	L	**138**	10^3/ul	150 - 450
RBC Count (Method:Hydrodynamically focussed Electrical impedance)		5.10	10^6/uL	4.5 - 6.5
Blood Cell Indices				
Packed cell volume(PCV) (Cumulative pulse height method)		42.70	%	40 - 50
M.C.V. (Method;Calculated Values)		83.7	fL	83 - 101
M.C.H.		28.4	pg	27-32
M.C.H.C.		34.0	g/dL	31.5 - 34.5
RBC Distribution Width -CV (RDW-CV)	H	**13.9**	%	8 - 12
RDW-SD		42.5	fl	39.0-46.0

Age/Sex	: **19 YEARS/MALE**		Reported	:	**01/01/2025 01:06PM**

TEST NAME		RESULTS	UNITS	BIO.REF.RANGE
Cell Counter				
PDW		10.70	fL	8.1 - 25.0
MPV		10.30	fL	8.0 - 11.8
P-LCR		25.90	%	15 - 35
PCT	L	**0.10**	%	0.20 - 0.25
IG		0.30	%	0 - 1

RDW-SD (Red Blood Cell Distribution Width)- It is the red cell volume divided by mean corpuscular volume (MCV). Raised values indicate nutrient deficiencies like iron,folate and Vit B12. Low levels mean red cells vary little in size. RDW is seen significantly higher in diabetic patients. High levels are also associated with low Vit D levels.

PDW (Platelet Distribution Width) reflects variability in platelet size.. Marker of platelet function and activation. High values indicate bone marrow making new platelets.

MPV (Mean Platelet Volume) measures average size of the platelets. Raised value means increased production by bone marrow. High values seen in thrombocytopenia, myeloproliferative diseases and blood cancers.

P-LCR (Platelet Large Cell Ratio) is an indicator of circulating larger platelet (>12fl). Used to monitor platelet activity.

PCT (Plateletcrit) is the volume occupied by platelets in the blood as a percentage.

IG (Immature Granulocytes) are WBCs that are immature. Measures the amount of immunoglobulins in the blood. Raised levels are seen in infections, inflammation or cancer. Increased IG count indicates early innate immune response.

TEST NAME	RESULTS	UNITS	BIO.REF.RANGE

Primary Sample Type: Serum

TYPHIDOT PROFILE

TYPHIDOT IgG	NEGATIVE
TYPHIDOT IgM	NEGATIVE

INTERPRETATION:

¢ IgM Positive only : ACUTE TYPHOID FEVER.

¢ IgM & IgG Positive : ACUTE TYPHOID FEVER.
(In the middle stage of Infection)

¢ IgG Positive : Implication for the presence of IgM antibodies include previous infection (In which case current fever may not be due to TYPHOID) relapse or re-infection therefore. It is important that interpretation be made together with the clinical symptoms in order to diagnose if the patient is currently having TYPHOID.

¢ IgM & IgG NEGATIVE : PROBABLY NOT TYPHOID

Note : * Marked Test is accredited by NABL.
